fitlet2 FC-USB installation instructions

Package Content

| 2x retaining Washer	2x 6mm Phillips screw	1x 3pin power cable	1x FC-USB

1x side panel

**1** Plug the 3pin power cable to the back of the FC-USB in the J1 port

2 Place the retaining washers at the designated location on the cooling plate and seat the FC-USB on-top of them. Then fasten the 2x Phillips screws

**(!)** The cooling plate should be supplied with the product's packaging or already assembled.

3 Place the red module spacer in the designated location then place the M.2 storage component side facing downward to the thermal pad. Then fasten using the 1x Phillips screw

**(!)** The red module spacer should be supplied with the product's packaging or already assembled

4 Plug the 3pin power cable to the J11 port

**5** Assemble the cooling plate with the components installed as a whole unit to the M.2 connectors

6 Fasten the cooling plate in place assembling the 3x Phillips screws.
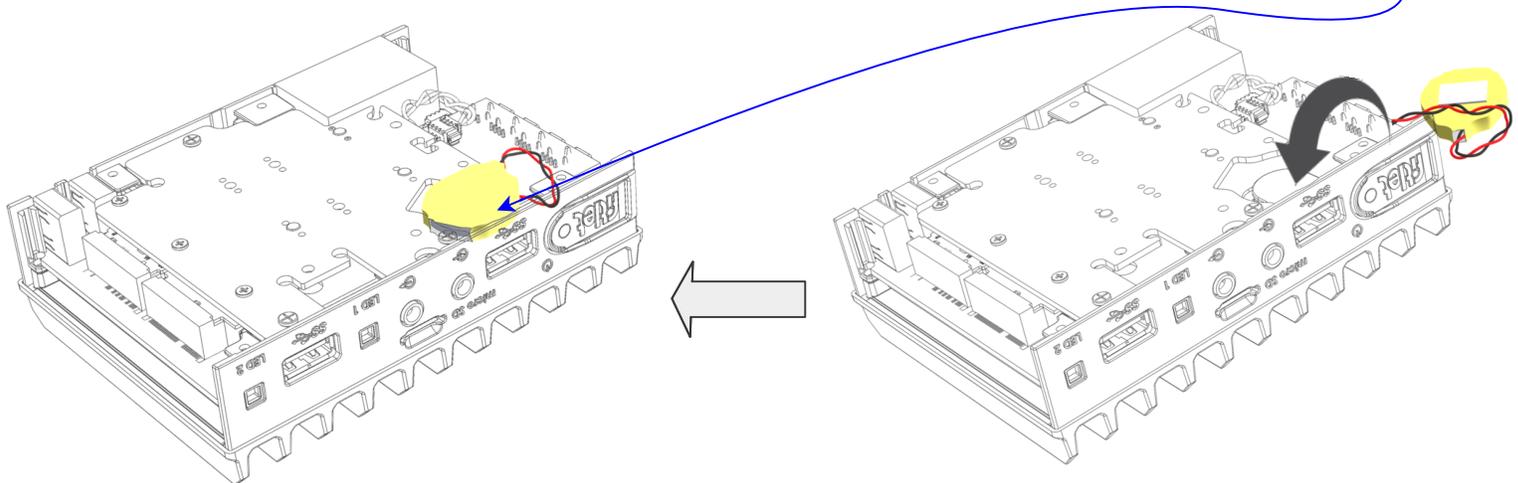

**(!)** The 3x Philips screws supplied with the product's packaging or already assembled.

7 Stick the RTC battery in its place

⑨ Screw the 4x Phillips enclosure screw half way, enough to hold the bottom cover in-place but not too tight

Bring both side panels in place, and hold them

Complete by tightening the Phillips enclosure screws all the way down, while holding the side panels
